Token endpoint  
Capabilities endpoint

STATUS  
Failed

### CAPABILITIES ENDPOINT

ACCESS TOKEN EXPIRED Token active at exp - 10 minutes	Passed
ACCESS TOKEN EXPIRED Token expired at exp + 10 minutes	Passed
ACCESS TOKEN INVALID Access token is invalid, token is modified	Passed
ADDITIONAL PARAMS Sends a valid access token + additional GET query string parameters, parameters should be ignored and full capa...	Passed
ADDITIONAL PARAMS Sends a valid request + additional GET query string parameters, parameters should be ignored and public capabili...	Passed
AUTHORIZATION NOT BEARER Authorization' header is not 'Bearer' + 'value'	Passed
HTTP WRONG METHOD HTTP method is not GET (with access token)	Passed
HTTP WRONG METHOD HTTP method is not GET (without access token)	Passed
VALID REQUEST Sends a valid capabilities request without access token, expected response contains the public capabilities overview wit...	Passed
VALID REQUEST Sends a valid capabilities request, expected response contains full capabilities overview in signed JWT_token	Passed

### TOKEN ENDPOINT

ADDITIONAL PARAMS Sends a valid token request but with more parameters than expected. Additional params should be ignored and a...	Passed
ASSERTION INVALID ALG Client assertion JWT header 'alg' field is different algorithm than RS or a lower value than RS256 (i.e. 128, 64 e...	Passed
ASSERTION INVALID AUD Client assertion JWT payload 'aud' field is different value than the server's iSHARE client id	Passed
ASSERTION INVALID EXP Client assertion JWT payload 'exp' field is different value than 'iat' field + 30 seconds	Passed
ASSERTION INVALID IAT Client assertion JWT payload 'iat' field is after current time	Passed
ASSERTION INVALID ISS Client assertion JWT payload 'iss' field is different value from Client_id request parameter	Passed
ASSERTION INVALID SIGNATURE Client assertion JWT signature key used does not correspond with public key from the x5c certificate	Passed
ASSERTION INVALID SUB Client assertion JWT payload 'sub' field is different value than 'iss' field	Passed
ASSERTION INVALID TYP Client assertion JWT header 'typ' field is other value than 'jwt'	Passed
ASSERTION INVALID X5C Client assertion JWT header 'x5c' contains other value than valid x509 certificate	Passed
ASSERTION MISSING ALG Client assertion JWT header 'alg' field missing	Passed
ASSERTION MISSING AUD Client assertion JWT payload 'aud' field missing	Passed
ASSERTION MISSING EXP Client assertion JWT payload 'exp' field missing	Passed
ASSERTION MISSING IAT Client assertion JWT payload 'iat' field missing	Passed
ASSERTION MISSING ISS Client assertion JWT payload 'iss' field missing	Passed
ASSERTION MISSING JTI Client assertion JWT payload 'jti' field missing	Passed
ASSERTION MISSING SIGNATURE Client assertion JWT signature missing	Passed
ASSERTION MISSING SUB Client assertion JWT payload 'sub' field missing	Passed
ASSERTION MISSING TYP Client assertion JWT header 'typ' field missing	Passed
ASSERTION MISSING X5C Client assertion JWT header contains no 'x5c' array	Passed
CLIENT ID NOT ACTIVE Request client ID value is known at scheme owner but not listed as 'active'	Passed
HTTP BODY INVALID TYPE POST Request body is not 'x-www-form-urlencoded'	Failed
HTTP WRONG METHOD HTTP method is not POST	Passed
INVALID CERTIFICATE - EXPIRED Client assertion JWT header 'x5c' contains invalid certificate - the certificate is expired	Passed
INVALID CERTIFICATE - KEY SIZE Client assertion JWT header 'x5c' contains invalid certificate - the key size is less than 2048 bits	Passed

INVALID CERTIFICATE- RSA Client assertion JWT header 'x5c' contains invalid certificate--the algorithm is not RSA	Passed
INVALID CLIENT ASSERTION TYPE Request client assertion type has other value than urn:ietf:params:oauth:client-assertion-type:jwt-b...	Passed
INVALID CLIENT ID Request client ID is not same value as Test certificate Serial Number	Passed
INVALID GRANT TYPE Request has other value than 'client_credentials'	Passed
INVALID SCOPE Request scope has other value than iSHARE	Passed
MISSING CLIENT ASSERTION Request has no client assertion	Passed
MISSING CLIENT ASSERTION TYPE Request has no client assertion type	Passed
MISSING CLIENT ID Request has no client id	Passed
MISSING GRANT TYPE Request has no grant type	Passed
MISSING SCOPE Request has no scope	Passed
UNKNOWN CLIENT ID Request client ID value is unknown with scheme owner	Passed
UNTRUSTED CERTIFICATE Client assertion JWT header 'x5c' contains certificate(s) not issued by iSHARE trusted root	Passed
VALID REQUEST Sends a valid token request, expected response contains the access token, expiry time and 'bearer' type	Passed
WRONG CERTIFICATE Client assertion JWT header 'x5c' contains valid certificate, but from different party	Passed
